CPSC Warns Backyard Pool Drownings Happen "Quickly and Silently"

WASHINGTON, D.C. - According to the U.S. Consumer Product Safety Commission, in recent years an average of about 250 children under 5 years old drowned in pools nationwide annually. More than half of these deaths occurred in the summer months. Among unintentional injuries, drowning is the second leading cause of death to this age group after motor vehicle incidents. Another 2,700 children are treated in hospital emergency rooms each year for near-drowning incidents. Most of these cases involve residential pools.

"Most people assume if their young child falls into the pool, there will be lots of splashing and screaming, and plenty of time to react," said commission Chairman Hal Stratton. "In reality, a child slips into the water and often goes under the surface. These drownings can happen quickly and silently - without warning."

The key to preventing these tragedies is to have layers of protection. This includes placing barriers around your pool to prevent access, using alarms on doors that access the pool, and being prepared in case of an emergency.

Though it seems obvious, close supervision of young children is vital for families with a home pool - and not just when outside using the pool. A common scenario is that young children leave the house without a parent or caregiver realizing it. Children are drawn to water, not knowing the terrible danger pools can pose. Also, just because children know how to swim, doesn't mean they are drown-proof. All children should be supervised every second while in and around the pool.

The commission offers these additional tips to prevent drowning:

- Fences and walls should be at least 4 feet high and installed completely around the pool. Fence
 gates should be self-closing and self- latching. The latch should be out of a small child's reach.
 Keep furniture that could be used for climbing into the pool area away from fences.
- If your house forms one side of the barrier to the pool, then doors leading from the house to the pool should be protected with alarms that produce a sound when a door is unexpectedly opened.
- A power safety cover -- a motor-powered barrier that can be placed over the water area -- can be used when the pool is not in use.
- Keep rescue equipment by the pool and be sure a phone is poolside with emergency numbers posted. Knowing cardiopulmonary resuscitation (CPR) can be a lifesaver.
- Don't leave pool toys and floats in the pool or pool area that may attract young children to the water.
- For above-ground pools, steps and ladders to the pool should be secured and locked, or removed when the pool is not in use.

- If a child is missing, always look in the pool first. Seconds count in preventing death or disability.
- Pool alarms can be used as an added precaution. Look for alarms that meet the requirements of the ASTM standard. The commission advises that consumers use remote alarm receivers so the alarm can be heard inside the house or in other places away from the pool area.
- To prevent body entrapment and hair entrapment/entanglement, have a qualified pool
 professional inspect the drain suction fittings and covers on your pool and spa to be sure that
 they are the proper size, properly attached, and meet current safety standards. If your pool or spa
 has a single drain outlet, consider installing a safety vacuum release system that breaks the
 vacuum to avoid potential entrapment conditions.

The commission offers three free publications consumers can use to help prevent child drowning: <u>Safety Barrier Guidelines for Pools (PDF)</u>, <u>How to Plan for the Unexpected (PDF)</u> and <u>Guidelines for Entrapment Hazards: Making Pools and Spas Safer (PDF)</u>. Copies of these publications can be obtained by going to our Web site at www.cpsc.gov, by calling our Hotline at (800) 638-2772, or by writing to "Pool Safety", U.S. Consumer Product Safety Commission, Washington, D.C., 20207.

Send the link for this page to a friend! The U.S. Consumer Product Safety Commission is charged with protecting the public from unreasonable risks of serious injury or death from thousands of types of consumer products under the agency's jurisdiction. The CPSC is committed to protecting consumers and families from products that pose a fire, electrical, chemical, or mechanical hazard. The CPSC's work to ensure the safety of consumer products - such as toys, cribs, power tools, cigarette lighters, and household chemicals - contributed significantly to the decline in the rate of deaths and injuries associated with consumer products over the past 30 years.

To report a dangerous product or a product-related injury, call CPSC's Hotline at (800) 638-2772 or CPSC's teletypewriter at (800) 638-8270. To join a CPSC e-mail subscription list, please go to https://www.cpsc.gov/cpsclist.aspx. Consumers can obtain recall and general safety information by logging on to CPSC's Web site at www.cpsc.gov.
